

Cam Le Messurier

Senior Software Engineer

camlemessurier.dev 0423886255

Summary

I'm a full-stack senior engineer with 6+ years of experience building software for everything from startups to large banks and consultancies. Adept across the full development stack, with deep expertise in backend, frontend, DevOps, and systems architecture.

I'm big on clear communication, team collaboration, and mentoring, and I love applying systems thinking to help teams ship great software faster. Whether I'm hands-on coding or guiding a team through complex decisions, I aim to raise the bar and keep things moving forward.

Relevant Experience

Senior Software Engineer, **Digizoo Services**

October 2023 — March 2026 Sydney (Hybrid)

Worked across several client engagements in the finance sector as part of a boutique technology consultancy.

- Built high-throughput real-time data pipelines bridging core banking and digital services for a major international bank.
- Delivered engineering uplift for a major regional Australian bank.
- Developed banking integration products targeting the mutual banking sector.

NestJS

TypeScript

SQL Server

Turborepo

Azure

Kafka

KStreams

Avro

Spring

Java

Grafana

Prometheus

OTEL

Unix

Software Engineer, **Greater Bank**

April 2022 — October 2023 Newcastle (Hybrid)

I helped build and deliver a modern, cloud-first digital bank from the ground up.

- Helped design and implement a multi-repo release and regression strategy spanning the entire digital stack.
- Designed and deployed shared CI/CD configuration across microservices to standardise and enforce release, testing, quality, and compliance processes.
- Implemented an automated dependency management solution for 30+ repositories to meet strict security requirements.
- Performed performance testing and fixed bottlenecks, leading to considerable increases in application stability and significant reduction in response times.

Kubernetes

Helm

Spring

Kotlin

Angular

TypeScript

TestCafe

Jest

GCP

OpenAPI

GitLab CI

Software Engineer, **BodyMindLife Online**

October 2021 — April 2022 Newcastle (Hybrid)

Worked with a startup team to build and grow a new online yoga streaming platform.

- Participated in all stages of feature development from inception to deployment.
- Automated and integrated end-to-end testing via CI/CD pipelines.
- Developed an authentication microservice gateway connecting multiple IAM providers.

Next.js

React

TypeScript

Apollo Client

Contentful

Tailwind

Cypress

Jest

GitHub Actions

Go

GCP

Software Engineer Intern, **Userlot**

February 2021 — October 2021 Newcastle (Hybrid)

As part of UON's Work Integrated Learning project, I built an embeddable third-party widget to collect surveys from customers and capture data in a dashboard for a local tech startup.

React

Apollo Client

GraphQL

Preact

Webpack

Ruby on Rails

Sidekiq

Junior Software Engineer, **Newton Green Technologies**

November 2020 — October 2021 Newcastle (Hybrid)

- Real-time aged care communication platform (Whistle).
- Community pest tracker (FeralScan).

Laravel

PHP

Redis

ServiceStack

C#

Junior Developer, **Global Acoustics**

February 2020 — November 2020 Newcastle

Independently delivered a full-stack safety management tracker used by on-the-ground teams every day to log safety and compliance paperwork.

Next.js

Express

GraphQL

OAuth

Docker Compose

NGINX

TypeORM

Chakra UI

Redis
